

Husky sees double-digit growth in India and region

Husky Injection Molding Systems Ltd. sees India as a strategic market, with sectors like packaging, medical and automotive driving growth of more than 10 percent a year, a company executive said at the recent Plastindia 2018 show. Husky entered the Indian market in 1999, opened an office in Mumbai in 2001 and opened the factory in Chennai in 2009. The facility supports Husky's hot runner and mold refurbishing business in the region. At the show, it exhibited co-injection multi-layer technology and PET tooling self-cleaning and integrated mold alignment technology.
